### Healthy Tree

Fourth grade students at Napoleonville Primary selected and planted five fruit trees as part of the "Healthy Tree Project" funded by the Assumption Education Fund. An inservice led by John Giambrone, eighth grade Science teacher and Coastal Roots representative, was held for the students on the proper way to plant and care for their fruit trees. Students took part in the planting of the trees and are presently responsible for watering and taking care of them. The task of caring for the trees will be passed on to future fourth graders at Napoleonville Primary.
